Basic Details of the Team and Problem Statement

Problem Statement Title: SkillForge – A Peer-to-Peer Skill Exchange Platform

Team Name: SYNC

Team Leader Name: Hansal Panchal

Institute Name: Parul University of Engineering and Technology (PIET)

Track Name: Web 2.0 (Full Stack + AI)

Idea/Approach Details

Describe your Idea/Solution/Prototype here:

- SkillForge is a peer-to-peer skill exchange platform that connects learners directly with individuals who possess real-world skills.
- Instead of relying on pre-recorded courses, users create profiles listing skills they can teach and skills they want to learn.
- An AI-based matching system analyzes user profiles, skill descriptions, availability, and preferences to recommend the most relevant matches.
- Users can directly chat, book live learning sessions, and rate each interaction, which helps improve future recommendations.
- The platform focuses on practical, human-to-human learning, making skill development affordable, interactive, and community-driven.

Add process flow chart or simulated image of prototype or any relevant image related to your idea

Describe your Technology stack here:

- **Frontend: React.js with Tailwind CSS for a responsive and modern user interface**
- **Backend: Node.js with Express.js for handling APIs, authentication, and session management**
- **Database: MongoDB for storing user profiles, skills, ratings, and bookings**
- **AI / Logic: Natural Language Processing (NLP) for analyzing skill descriptions and matching users based on relevance and preferences**
- **Authentication: JWT-based authentication for secure user access**
- **Deployment: Cloud-based hosting for scalability and performance**

Idea/Approach Details

Describe your Use Cases here

- Students learning practical skills (coding, design, communication) from peers or seniors through live sessions
- Skilled individuals sharing their expertise and earning by teaching real-world skills
- Peer-to-peer learning communities within university campuses
- Short-term skill exchange for hackathons, interviews, and project preparation
- Affordable upskilling without enrolling in expensive online courses

Describe your Dependencies / Show stopper here

- Availability of active users with diverse skills on the platform
- Accuracy of AI-based skill matching depends on quality of user profile data
- Stable internet connectivity for live chat and learning sessions
- User trust and safety handled through ratings and moderation
- Initial cold-start problem until sufficient user data is collected

Important Pointers

Please ensure below pointers are met while

- Kindly keep the maximum slides limit to 4 pages
- All the topics should be utilized for description of your idea
- Try to avoid paragraphs and post your idea in points
- Keep your explanation precisely and easy to understand
- Idea should be unique and novel. If it has a business potential more weightage will be given.
- Apart from this PPT abstract of your idea will be asked separately while submitting
- You need to save the file in PDF and upload the same on portal. No PPT, Word Doc or any other format will be supported
- Delete this slide (Important Pointers) when you upload the details of your idea on portal.
